

1. Set your inkjet printer to the setting as specified on the printable fabric packaging.
2. Choose the page with the initial letter you would like to print (A-Z provided).
3. Print as many copies as you require.
5. Where folds and stitch lines are indicated, iron these into position. The iron marks can be used to keep stitching lines straight.
6. Cut the bag out to size using the outer perimeter as a guide.
7. Start by hemming the top edge, folding the fabric down twice to give a neat appearance.
8. Fold the bag in halves, right sides together using the fold line as a guide. Iron this fold into place.
9. Fold the side seam down twice as indicated. Starting 5mm from the top of the bag, sew the side seam down towards the bottom of the bag. It is important this seam does not start at the very top or you won't be able to thread through the drawstring later.
10. Stitch the bottom of the bag from the outer edge into the centreline.
11. Turn the bag right side out and press.
12. Using a safety pin as an anchor, attach the thread or ribbon you'd like to use as the drawstring. Draw the thread or ribbon through the opening left at the top of the bag. Remove safety pin.
13. Fill with the Cross-stitch Instruction Booklet and mini sewing kit as a favour for guests.
